

MAGICARD **XXL** PRO XTENDED

Magicard XXL Xtended

Longer cards for greater impact, visibility and security

When it comes to events, a standard credit card sized pass is often considered too small. The XXL Xtended is basically an adapted Magicard Rio which enables you to produce longer, more distinctive ID cards. Fast, easy to use, and reliable, the Xtended features a high security watermark (applied during the print cycle without incurring extra consumable costs), a Plug & Play driver, standard native USB and Ethernet fitted as a standard, a convenient display, a three year warranty, and an easy "drop in" printhead exchange. By using partially preprinted cards with a width of 54,0 mm and a length up to max. 140 mm, you can personalise the card on one side with name, photo and cardholder details. The actual print area is 86,0 x 54,0 mm and you can use the standard LC1 or LC3 Magicard ribbons for your personalisation.

The XXL Xtended is the professional's choice for ticketing and accreditation purposes, where oversized cards are preferred. Oversized XXL passes have proven to be very popular for events. They are easily noticed from a distance and they leave enough room for generic and individual information (including a large photograph, where applicable) as well as for advertising or maps and rules.

Preprinted XXL Xtended- cards sized 140 x 54mm or 110 x 54mm can be personalized within a maximum area of 86,0 x 54,0 mm individually. The recommended print area is 82,0 x 51,0 mm

Optionally, the inline encoding of contactless chips is possible.
