

Magicard XXL Pro Printer

Larger format cards for greater impact and visibility

When it comes to events, a standard credit card sized pass is often considered too small. The XXL Pro overcomes this problem by allowing you to produce large format, high impact cards. The XXL Pro, comes with a number of professional features. Fast, easy to use, and reliable, the XXL Pro features a high security watermark (applied during the print cycle without incurring extra consumables costs), a Plug & Play driver, standard native USB and Ethernet fitted as standard, a convenient display, a selection switch for the card printing area position, a three year warranty, and an easy "drop in" printhead exchange.

The XXL Pro is the professional's choice for ticketing and accreditation purposes, where oversized cards are preferred. Oversized XXL passes have proven to be very popular for events. They are easily noticed from a distance and they leave enough room for generic and individual information (including a large photograph, where applicable) as well as for advertising or maps and rules.

Preprinted XXL- cards sized 124,8 x 87,8 mm (4,91" x 3,46") or 140,0 x 87,8 mm (5,51" x 3,46") can be personalized within a maximum area of 86,0 x 54,0 (3,39" x 2,13") mm individually. The recommended print area is 82,0 x 51,0 mm (3,32" x 2,01").

Optionally, the inline encoding of contactless chips is possible.

XXL Pro - The new specialist for special events.
